Software Engineer with extensive experience in React.js and Next.js. Dedicated to creating dynamic and efficient user interfaces when developing websites and web applications with JavaScript, applying processes centered on the user experience. Strong ability to identify opportunities for improvement in digital products, thanks to more than 10 years of experience as an image, audio, and video producer.

EXPERIENCE

Perficient, Senior Consultant — Octubre 2025 - Abril 2026

- Led the development of modern, high-performance web applications using React and Next.js.
- Served as the strategic bridge between the design and engineering teams.
- Transformed complex visual concepts into scalable and interactive component systems, ensuring pixel-perfect design fidelity and elevating the product's aesthetic quality without compromising performance, accessibility, or user experience (UX).

Sorcol, Frontend Developer — July 2023 - July 2025

- Lead a team of female developers, working on new technical and leadership skills.
- Develop with React, JavaScript, Semantic HTML, React Hooks, Context, Fetch, Axios, Redux, and Tailwind among many other tools to build efficient and responsive interfaces, manage version control with Git and GitHub, and coordinate workflow with Jira.
- Foster an environment of collaboration and continuous learning, implementing good development practices and ensuring code quality through constant reviews and testing.

Globant, Web UI Developer Semi-senior — March 2021 - May 2023

- Development of features, identification, and resolution of bugs, effective communication with design, UX teams, and clients in projects for major industries such as Retail, Health, and internal company products. Tech stack: JavaScript vanilla, React.js, React Redux, React Hooks, HTML5, CSS3, Styled-components, Sass, Git, Github, Jira, Slack.

Distriandamios SAS, Digital master — 2020

- Creation and maintenance of corporate website. Tech stack: JavaScript vanilla, React.js, HTML5, CSS3, Styled-components, Git & Github.

Viverplas, Digital master — 2019

- Creation and maintenance of corporate website. Tech stack: JavaScript vanilla, HTML5, CSS3, WordPress.

Freelance — Since 2011
